3. SEPA return reasons and corresponding numerical text key extensions

Experience shows that the return rate of SEPA Credit Transfers (SCT) is very low, significantly less than 1%. Despite the large number of different return reasons, rejections are made mainly due to incorrect IBAN (AC01) and deleted account (AC04). The return rate of SEPA Direct Debits B2B (SDD B2B) is in the 1% range, with the most frequent reasons being other reasons (MS03, also contains anonymised due to insufficient funds AM04) and no valid mandate (MD01).

Returns are most frequently expected for submissions of SEPA Direct Debit CORE (SDD CORE), accounting for just above 2%. Again, the potential SEPA Reason Codes for returns are concentrated on few codes. The table below lists the most common codes, the processing of which should be prepared, if possible, even automatically.
